I specialize in developing and maintaining web applications, with expertise across various domains including e-commerce, education, and travel. I excel at building scalable solutions tailored to the unique needs of each domain, ensuring optimal performance and user satisfaction. As a passionate software developer and current BTech student, I am eager to enhance my skills and pursue impactful opportunities in the software development field.

Objective

To contribute to an innovative organization where I can make a meaningful impact through my work. Seeking a challenging environment that fosters growth and development, enabling me to become a skilled and effective software engineer.

AREAS OF EXPERTISE

Key skills: JavaScript, C, Python, Java, C++, HTML, CSS
Databases**: MySQL, MongoDB**

PROJECTS

E-Commerce Website

- **Admin Panel Features**: Category Management, Product Management, Sales Overview
- **Client-Side Features**: Product Browsing, Shopping Cart, User Authentication

College Official Website
Developed the official website for my college, integrating user-friendly navigation, optimized loading times, and responsive design.

AIML Deftech Company Website
Built a dynamic website for AIML Deftech, featuring AI and ML-based services with an intuitive user interface and scalable architecture.

Face Recognition using Python
Created a face recognition system using Python and OpenCV, enabling efficient facial detection and recognition.
